

Lines of Development

28th January - 1st February

*We thought about how we might develop patterns of our own, creating repeating patterns using 2 and 3 shapes. ***What are the rules we need to follow?***

*Using this idea we thought more about symmetry and how patterns can be reflected. We considered where these types of patterns might appear in nature. ***We challenged ourselves to see if we could create symmetrical patterns of our own.***

*Using the idea of rotation, we thought carefully about how shapes can be translated to achieve new patterns. ***How can we turn shapes to achieve a required design?***

*We looked at the artist Mondrian to see how shapes were used. ***Can we recognise features of design in the work of others?***
