

Lines of Development

4th February - 8th February

*We continued to look at patterns in the world around us. We went out to explore and see what we could find. **Can we notice patterns and symmetry in our surroundings?**

*We explored natural birds' feathers and used them to create individual patterns of our own. **What can we do with natural materials?**

*We also looked at peacock feathers, using them as a provocation for wire and metal work of our own. **Can we use tools to combine materials, to create?**

*We began to weave our winter baskets, using coloured wools, to create our own individual patterns. **How can we use what we know about patterns to create works of our own?**
