

'Let's Learn'

We have been learning about:

16.03.18

This week we began our zoology studies in style, with the birthing of three beautiful baby chicks!

All of our children enjoyed the experience and it elicited many wonderful conversations, drawings and explorations that I am sure will remain as memories with your children for many years to come.

Please do take time to talk about the learning which has taken place this week, using the chicks as a stimulus for further discussion.

In phonics we have continued to work hard to complete our super star phase 3 reading challenge. This includes all phase 2 and 3 phonemes and diagraphs, read at speed.

This week, Ellie Harvey completed the challenge with great success and we commend her hard work.

Well done!

This week we talked lots about birds as a wider topic. We thought about the characteristics of this species, before drawing and labelling birds of our own. Next week we will continue to learn the names of common birds in our area, what they look like and learn about how we can support them by making bird feeders.

Sadly there have been a number of children this week who have nothing recorded in their reading diaries for home reading.

Please do ensure that you read every day with your child and record the reading you have done, so that I know this is happening and can then offer further, appropriate support.

Reading is the most important aspect of our curriculum and should be completed as part of your daily routine.

Thank you.

Next week is Sports Relief Week.

We will be involved in many physical activities and so we are sending home PE kits in order you may prepare to dress your children appropriately to participate.

Please can children come to school each day, already in their sportswear for the whole week. This will help to make transitions smooth and easy.

Thank you.
