

'Let's Learn'

We have been learning about:

w/c 04.10.20

We have had a really exciting week at Leo's Nursery learning all about Space. The children have been really engaged and have enjoyed learning all the names of the planets, junk modelling rockets, role playing with the small world space ships, rockets and astronaut toys, reading space books and learning new facts. Our treasured text has been 'Whatever next' by Jill Murphy. We have learnt a new song retelling the story which we have all loved learning. Mental Health day was very bright and cheerful seeing everyone wearing yellow. The children all spoke about what makes them happy/and or sad. It has been great to receive some of your Space homework this week and I am really looking forward to getting more. So far we have seen construction rockets and space ships using magnetic blocks, a family poster of the solar system, colouring in and a homemade astronaut helmet. Well Done Nursery.

Harvest Donations

Every year we ask our parents and children to donate no perishable food goods (tins and packets etc) to the House of bread Charity. Please send any donations in with your child next week.

Child of the week

Jacob is our child of the week. We are looking forward to receiving an email from Jacob's parents about something he would like to share with the group next week.

Thank you for all your support

Mrs Whittick and the Nursery Team
