

# 'Let's Learn'

We have been learning about:

w/c 16.03.20

This week we have learnt all about a new artist called Wassily Kandinsky. We have learnt all about his style of painting and about primary colours. The children have used collage techniques to recreate one of his pieces. We have also learnt about mixing primary colours to make secondary colours which was very interesting. We are also exploring our maths collections to use 2D shapes to make pictures, learn about shape, space, measure and tessellation. We now have an iPad in the classroom for the children to use a QR scanner app to scan identification cards of birds which the children have learnt how to use very quickly. They are enjoying finding out new information on different birds such as listening to the bird noises and watching the video clips about each bird.

Please rest assured we are making sure all children are washing their hands more often and properly. Please promote good hand washing at home etc. Thank you.

## Award of the week

Jacob received the award this week for his improved concentration and listening recently.

## PE Award

Ollie F won the award in PE for helping the other children.

Thank you for all your support

Mrs Whittick and the Nursery Team
