

Recovery Curriculum

March/April 2021

When all the children returned to school on March 8th, as a school we made the decision to put the mental health and well-being of the children at the heart of our recovery curriculum to help the children adjust to life back in school.

As a school we are very much focusing on the positives and looking forward to the future, developing the children's growth mind-set.

All classes provided opportunities for the children to focus on their social skills, emotions, positivity and school values. For example, KSI focused on a book called 'What We'll Build' and one class have carried out team building activities creating wooden family photo frames using the saws, working together to help each other and to thank their families for their support with home learning.

KS2 focused on team building, gratitude and positivity with a focus on physical activity and outdoor learning (Forest School)

Also the Art lead Miss Wright asked each class to create a positivity themed display for the school focusing on our school values.
